

# YEARLSTONE

VINTAGE 2010 ACROSS THE SOUTH WEST IS GOOD!

## ESTIMATED 70 TONS IN 2010 HARVEST AT YEARLSTONE

The final pick of 550kg of Pinot Gris was made on Friday Oct 22, and the final pressing is booked in for Monday October 25.

They bring an end to perhaps the biggest crop of the decade for the South West - 70 tons from 16 vineyards have been processed in our winery.

That beats the previous record of 60 tons in 2006.

Ripeness levels across the range of grape varieties have been good - acidities a little high reflecting the relative lack of warmth in August & September. Full details of the ripeness and acidities of all varieties will be published early next week on our web site for those interested.

Once again - good for sparkling wines - and we are making 25,000 litres of fizz - far more than ever before.

For our team of Juliet, Roger, Markus & John it has been an unbroken month of morning, afternoon and evening pressing.

Yearlstone's own crop was sound and ripe - for the second year some lovely Pinot Noir, and our usual excellent crops of Seyval and Madeines.

A SELECTION!
